

## Greenfield Primary School

## Geography for Year 1 and Year 2, Spring Term

Identify seasonal and daily weather patterns in the UK.

Locate hot and cold places in the world.

seasons	The year is divided into four <b>seasons</b> : spring, summer, autumn and winter.
temperature	A measure of how hot or cold something is.
thermometer	An instrument used to measure <b>temperature</b> .

### Seasonal Changes

There are changes in weather in each **season**. In spring, it is often rainy and the **temperature** begins to get warmer.

In summer, the sun is much stronger. The **temperature** is warmer than in any other **season**.

In the autumn, the weather turns chillier, windier and there is often rain.

In the winter, it is often cold and frosty. It has to be freezing cold to snow.

At the top and bottom of the Earth are the poles.

The **equator** is an imaginary **line** around the middle of the Earth.

Places near the Equator are **hot**.

Places near the North and South Pole are **cold**.
